

SUJAL KUMAR

CS Undergrad | AI/ML Engineer Intern

+91 6207210784 | sujalreal983@gmail.com | [linkedin.com/in/Sujal-kumar](https://www.linkedin.com/in/Sujal-kumar) | github.com/Sujal | sujal.rocks

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience building and deploying AI/ML systems, including NLP pipelines and model evaluation workflows. Proficient in Python, machine learning frameworks, and data processing, with experience in fine-tuning models, working with LLMs, and implementing explainable AI techniques. Strong foundation in data-driven problem solving, model optimization, and end to end ML project development. Seeking opportunities to apply machine learning to real-world problems and scale intelligent systems.

TECHNICAL SKILLS

AI / ML	HuggingFace Transformers, LangChain, n8n, Workflow Automation, Prompt Engineering, RAG, RLHF, Fine-tuning LLMs, Model Evaluation & Benchmarking
Languages	Python (primary), JavaScript (ES6+), TypeScript, C/C++, Bash
Frameworks	Django, FastAPI, Streamlit, React.js, REST APIs, WebSockets
Data & Tools	NumPy, Pandas, Matplotlib, Scikit-learn, PostgreSQL, MySQL, Data Validation, JSON/CSV pipelines, Git, GitHub, Jupyter Notebooks
Cloud & Deploy	Google Cloud Platform, AWS (S3/EC2 basics), Render, Vercel, Docker (basics), CI/CD Pipelines, Linux
Dev Practices	Agile/Scrum, Code Review, API Integration, Testing and Debugging
Models	Model training with the algorithms and learnings and train on a ditted dataset

PROJECTS

CRICK-BUDDY – AI Integrated Cricket Analysis Platform | Next.js, React.js, Node.js, Express.js, Tailwind CSS, Cricket APIs [url](#) [Github](#)

- Built a full-stack AI-powered cricket analytics platform combining real-time match data, player statistics, and tournament insights into a unified interactive system.
- Integrated third-party cricket APIs with optimized backend data fetching and caching to deliver live score updates, player performance tracking, and match analytics.
- Developed responsive dashboards and community-focused UI using Next.js and Tailwind CSS, improving user engagement across desktop and mobile devices.
- Implemented AI-driven performance analysis and prediction modules to generate player insights, match trends, and comparative statistics for local and international cricket data.
- Deployed scalable frontend and backend architecture using Vercel and Render with REST API communication and asynchronous data processing workflows.

AI Interview Simulator – Personal AI Interview Assistant|Next.js, FastAPI, Prisma, Clerk,Tailwind CSS [url](#) [Github](#)

- Developed an AI-powered interview preparation platform with adaptive questioning logic that dynamically adjusts interview difficulty based on user responses and confidence level.
- Built a FastAPI backend for real-time answer analysis, feedback generation, and communication skill evaluation with secure API integration and optimized response handling.
- Implemented authentication and user session management using Clerk and designed scalable database schemas using Prisma ORM for storing interview history and analytics.
- Created an interactive and responsive frontend using Next.js and Tailwind CSS with real-time interview simulations, performance tracking, and personalized improvement suggestions.
- Optimized application flow and backend communication to deliver low-latency AI feedback and seamless user experience across multiple interview domains.

French Classes Platform – Full Stack Educational Website | Next.js, React.js, Node.js, MongoDB, Tailwind CSS

- Built a modern full-stack educational platform for French language classes with responsive UI, course showcasing, student engagement features, and mobile-friendly design.
- Developed dynamic course management and inquiry handling systems with backend APIs, database integration, and structured student interaction workflows.
- Designed visually engaging landing pages and interactive sections tailored for teenagers and kids, focusing on accessibility, performance, and user retention.
- Integrated contact forms, enrollment workflows, and content management features to streamline communication between students, parents, and instructors.
- Improved website responsiveness, SEO optimization, and frontend performance using Next.js rendering capabilities and reusable component architecture

EXPERIENCE

June-July 2025

During my internship at [CodSoft](#) as a Full Stack Developer Intern, I worked on real-world web development projects using modern technologies such as Next.js, Node.js, Express.js, and Tailwind CSS. I contributed to building responsive and scalable web applications, collaborated on frontend and backend development tasks, integrated APIs, and improved application performance and user experience. The internship helped me strengthen my understanding of full-stack architecture, REST API development, database integration, and deployment workflows while gaining practical industry-level development experience in an agile working environment.

EDUCATION

B.Tech in Computer Science & Technology | 2023 – 2027

St. Andrews Institute of Technology & Management, Gurugram
